

The KAIZEN WAY: changing your way to see

KAIZEN[®]
INSTITUTE

Operating throughout Europe, Asia Pacific and the Americas, KAIZEN Institute provides creative, practical, global business support, improving operational performances from concept through implementation to new concept.

We need Italy-based consultants to work in Italy and Europe.

We support businesses of all sizes, in all sectors, manufacturing and services to improve their operations. We rely on an international matrix structure to access the global best practices and act locally.

We work with our clients to understand and implement their value streams whilst permanently eliminating waste. We capture the energy of people to enable them to transform their organizations and achieve their business goals.

We enable Organizations both to face radical changes and to evolve through one million microsteps. We enable People by transferring the necessary skills to make them autonomous in the management of their own improvement.

Companies implementing KAIZEN are place were people and performance never stop improving.

We offer technical expertise, training, coaching and leadership development programmes for every level and function from operators on the GEMBA to Top Management.

KAIZEN CONSULTANTS

- Inspire managers to design the sustainable roadmap to challenge the status quo in their organization and get better performances
- Energise people to achieve more than they can imagine, patiently building ownership, confidence and self esteem through effective results
- Give organisations the skills they need to become self-propelled self improvers

CANDIDATES

- You find enthusiasm in challenge and have constant self-motivation for your own personal growth
- You must possess a quantified record of business improvement and substantial operational experience
- You should be trained in global best practices (JIT, TPM, TPS, Lean) and in fast changing companies
- You have a good command of how to understand and implement value streams eliminating muda with the most appropriate technique
